# **FISH MAX**

**FISH OIL ROSIN**

FISH MAX is a flag ship product of VA BIOMAX made with years of research.

FISH MAX is the most standardized FISH OIL ROSIN made with enzymatic cold process to retain its natural properties.

FISH MAX is the purest form of fish oil.

FISH MAX contains highest percentage of omega -3-fatty acids.

Agriculture friendly water-soluble rosin formulation.

Highly effective against scaly insects, mealybugs and other insect pests.

Highly effective natural fungicide.

FISH MAX has got curative and preventive action.

Natural bactericide.

Other specialty of FISH MAX is its unique process which involves enzymatic cold processing technology whereby all vital nutrients in oil all retained to the fullest. Due to this process available nutrients FIS MAX are converted plant absorbable form which facilitates proper absorption into plants resulting faster and stable results.

FISH MAX offers long persistence.

FISH MAX offers good rain fastness and works as wetting agent.

FISH MAX when applied with other pesticides and fungicides improves their performance many folds.

FISH MAX It has a capacity of repelling insects from its hide outs and help in controlling them effectively.

FISH MAX single product with multiple uses works as a natural sticker, wetting agent, spreader and synergetic to other pesticides.
